## SCHOOL BUDGET APPROVED

The Board of Education, on Tuesday, July 15, approved a tentative budget for the Albany Unified School District in the amount of \$1,266,784. The final budget will be adopted following a public hearing, which was set for the board for 8 o'clock, Tuesday evening, August 5, in the Board of Education Room, 904 Talbot Avenue. The date for the public hearing, at which time local citizens may come for information on the budget and protest if they so desire, was set in lieu of the regular monthly board meeting of August 12.

The approved tentative budget, which will be published in The Albany Times prior to August 5, calls for a School District tax rate (not City) of \$3.20 per \$1000 assessed valuation.

In other business transacted by the Board at this meeting, Audrey Rein, Evelyn A. Eyring, Wallace Choy and Richard M. Vanzant were appointed as instructors at Albany High School; Sally Walbeck, Peter Allen, Richard Hull, Jack Lynch, William Leon and James Loveall, as teachers at the Albany Adult Center; Mrs. Emma G. Zuckermann, as part-time nurse at the Child Care Center; and Mrs. Hazel Rude, as head cook for the Marin School Cafeteria.

The board received reports on the Summer Elementary School, the Albany Adult Center Summer Session, the Child Guidance program for the last school year, and on the proposed curriculum program for elementary and secondary schools through Television Station KQED.

## Television Course Taught At Center

A course in television, taught by John Dyer, is being offered during the Summer Session of the Albany Adult Center, 13 Key Route Boulevard. The course, offered to the enrollment of those residing in or out of Albany, is designed as a continuation of that in advanced radio, although anyone who has some knowledge of basic electricity and radio-receiver theory is welcome.

The aim of the course, held on Wednesday evenings, 7 to 10, is to present in a non-mathematical way the theory and ideas behind television, including the study of modern television receivers. The topics to be covered will depend much as possible on the interests of the class, and the course will cover as much ground as time permits.

## Huge 3-Story Capwell Plant Draws Crowds

Traffic was "difficult" on San Pablo and Fairmount Avenues in El Cerrito last Wednesday as thousands came to attend the noon opening ceremonies and remained until long after the 9:30 p.m. closing hour. The crowds thinned out somewhat the following day, but the huge parking area was approximately half full again at opening time, with the daily volume holding up from day to day.

Sightseers and customers strolled about the two sales floors of the big store all week, keeping attendants at the 28 departments on the go from opening to closing time.

While the big Capwell plant is the major installation in the "Cerrito Plaza," other smaller structures are in process of building and will be opened from time to time, covering a multitude of products and services.

The new Capwell plant contains some 28 departments as follows, together with the names of the department managers:

Yardage & Patterns, Mrs. Esther Brooks; Linens, Domestic Bedding, Art Needlework, Harry Mayeda; Notions, Bath Shop, Larry Shulkin; Toilet Articles, Miss Jean Presbrey; Jewelry, Silverware, Luggage, Miss Lillian Pears; Books, Stationery, Cameras, Mrs. Patricia Falkner; Neckwear & Blouses, Handkerchiefs, Women's & Children's Clothes, Miss Florence Roberti; Handbags, Women's & Children's Hosiery, Robert Harmacek; Art Gifts, Home Accessories, Lamps, Pictures & Mirrors, Harold Thornton; Women's & Misses' Coats & Suits, Furs, Mrs. Helen Deiro; Better Dresses, Casual Dresses, Misses' Dresses, Mrs. Louise Detrick; Merritt Coat Shop, Merritt Dress Shop, Daytime Dresses & Aprons, Robert Birnbaum; Collegienne Coats, Suits, Dresses, Sportswear, Underwear, Robes, Mrs. Nancy Nelson; Sportswear Separates, Active Sportswear, Sweaters, Blouses & Dress Skirts, Miss Barbara Bishop.

## Major Building Projects Under Way In Albany

According to reports from the Albany City Engineer's office there are several fairly large building projects under way here in Albany boosting the city's permit totals for May and June by many thousands of dollars.

Among the items listed on the May report are: Vila Construction Company, addition to the Albany Bowl, \$40,000; G.M. Fisher, contractor, for a new residence at 767 Gateview Avenue, \$21,000; Carter & Rago, contractors, owner, new 12-unit apartment house at 841 Solano Ave.

The engineer's office also reports that plans, specifications and estimates have been completed for the Portland Avenue widening and bids are currently being advertised for. Plans also have been completed for the Jackson Street retaining wall at Castro Street.

## Albany Little League All Stars To Play Mt. Eden

The Albany Little League All Stars will play their first tournament game of the post-season play on next Monday, July 21, starting at 6 p.m., with the Mt. Eden All Stars at the Mt. Eden field.

The Albany group is especially anxious to have a good turnout to support our team which has just been fitted out with new uniforms. The 14 boys chosen to represent Albany in the tournament play from the 60 who took part in the regular season schedule were picked for their all-around ability at bat and in the field. Mt. Eden has promised to have an audience of a thousand on hand to support its contenders.

Here's how to get to the Mt. Eden field: Take the freeway to the San Mateo Bridge turnoff, turn right, and continue to the first set of signals, then turn right again for about 50 yards down the road, then a right turn into the Mt. Eden school yard.

## Hill Group Hears Planning Official

"Change is inevitable - we can't stand still without slow deterioration," said George Vila, member of the City Planning and Zoning Commission, at the Albany Hill Association meeting, last week at the home of Mr. and Mrs. Eldon Parr, 957 Hillside Ave. "We must always try to work toward a set goal and that's why Albany must review her building ordinances and zoning which have been in effect since 1923. Rezoning some sectors in town will give Albany leeway to build multiple dwellings, which are sorely needed, and will greatly improve some of the older areas that would otherwise start on the way downhill. This would also relieve the tax burden on the rest of the taxpayers."

After a short recess for refreshments the Albany Hill Association questioned some of the rezoning in their own area. Chairman Ray Cirimelli directed the rezoning committee to meet and review the plans previously discussed and make up an alternate plan to present at the next meeting, July 23, at the home of Mr. and Mrs. Carl Williams, for consideration and passing at meetings to follow. This alternate plan is to be completed before August 13, at which time it will be presented to the City Council at the rezoning hearing.

## COUNCIL HITS BAY POLLUTION THREAT

The Albany City Council went on record Monday night as "strenuously opposed" to any plan which would discharge sanitary district waste into the Bay, either at the mouth of Cerrito Creek, or southward from Point Isabel.

The action was taken following receipt of a report from City Engineer Wayne McAuley concerning the proposed waste discharge from Stege Sanitary District. A motion by Councilman Blank, seconded by Keck, to notify the Regional Water Pollution Control Board of the city's attitude, was passed unanimously.

Council also discussed briefly the proposal to open Evelyn and Cornell Avenues across Cerrito Creek into the newly opened shopping plaza, following a report by the city engineer. Due to highly technical aspects of the matter it was agreed that the city's traffic expert, D. Jackson Faustman, be asked to be present at the scheduled open hearing on the matter scheduled for August 4.

Approval also was voted on the proposal to extend the agreement with the Albany Unified School District covering the Child Care Center at the Village for another year at the present rate of \$250.

Revision of the recently passed "Going Out of Business Sale" ordinance, clarifying some of its terms and changing fees required, was approved on First Reading.

Recommendation of the Planning & Zoning Commission favoring a proposed parking lot at 734 San Pablo Avenue, was approved unanimously.

The commission's recommendation of approval for the rezoning of property at 1137 Talbot Avenue was heard and a public hearing set for July 28. The vote was 4 to 1, Mrs. Zahn opposing.

Councilman Blank announced he would be on vacation during the next two weeks.

Approval was given Police Chief Jensen for the purchase of three new police cars. This is a routine matter each year. Low bidder was the Curt Campbell Ford agency.

In addition to the election of officers there will be a report by delegates to the recent state convention at Sacramento. The installation of newly elected officers is scheduled to take place on Friday evening, August 1.

The Post also is planning to take part in the forthcoming 50th anniversary celebration of the founding of the City of Albany in September. ## LAW IN ACTION

### BEFORE THE TRIAL

Civil lawsuits start when a "plaintiff" files a complaint with a court clerk.

The "defendant" may challenge the plaintiff in a "demurrer," denying, for example, that the deeds complained of—though possibly true—are legal wrongs. He had a perfect right to do them.

Or the defendant may file an answer. It may deny some or all of what the plaintiff contends. For instance, in an automobile damage suit the defendant may say that he did not cause the accident, or that the plaintiff himself is to blame for it, wholly or in part.

Pleadings can get complex. The defendant, instead of merely denying things, may himself sue the plaintiff for damages in a "cross-complaint," claiming the plaintiff was to blame. And again, the plaintiff may in turn answer the cross-complaint to his first complaint.

About this time much of the

skirmishing is done, and the parties go before a judge for a pre-trial conference. There they seek to simplify questions of fact which a trial would answer. To save time the two parties may agree to many facts which they otherwise would have to prove. Where they cannot agree, either party can demand that pertinent facts—witnesses' testimony, documents and records—be handed over. In fact, the judge can order either side to produce facts before trial under our new "discovery" procedures.

Such pre-trial and discovery moves tend to bring about settlements and avoid trials. If the cases go to trial, the number of questions to be answered or facts to be proved tend to be reduced, and the trial is accordingly shortened.

Note: California lawyers offer this column so you may know about our laws.

## THE GUY IN THE OTHER LANE

You're at the stoplight, hubcap to hubcap waiting for the flick to green.

The car alongside hunches forward a little—and then something silly happens inside your brain. The traffic light becomes something like a starter's upraised gun. You seem crouched on a cinder track, digging your spikes savagely into the starting blocks. —Old devil horsepower is beginning to take over the controls. "Make this guy eat your exhaust!" he sneers. You nudge up, hubcap to hubcap again.

The green flash of the starter's gun. Down goes your foot pressure; up goes your blood pressure. A fender-to-fender sprint, and then you thrust half-a-hood ahead of your rival. A grin comes—not across your face—but crinkling across your brain in an ornery kind of way.

What about the guy in the other lane? Is he really out to beat you? Take a good look at him. He's brother-man! Shar-

er of your streets, your sun, your good green earth! He's the doc who brought your first-born into the world. Second vice-president of your PTA. He's the man whose son might marry your daughter, someday. —Walking down main street with him, kneecap to kneecap, you wouldn't even think of trying to beat him to the corner? So... why do humming wheels and engine lull us into stupidity? Why does old devil horsepower paralyze our brains? Why?

Turn on a smile for the guy in the other lane, instead of a sport of speed. Be quick with good-will instead of pick-up. —And, if he does carry a challenging chip on his fender, don't rise to his whizzing rate of speed; don't fall to his wheezing rate of mentality! Let him wheel on by toward that queer goal of his—a goal that's as dim and unknown to him as it is to you... and me... and to millions of other guys in other lanes.

### CHRISTIAN SCIENCE

How spiritual understanding of God as eternal Life brings health and healing will be explained in Christian Science services Sunday at 533 San Pablo Avenue in Albany.

Bible selections in the Lesson-Sermon on "Life" include the account in John of Christ Jesus' healing of the nobleman's son.

A correlative passage from "Science and Health with Key to the Scriptures" by Mary Baker Eddy declares: "Jesus never asked if disease were acute or chronic, and he never recommended attention to laws of health, never gave drugs, never prayed to know if God were willing that a man should live. He understood man, whose Life is God, to be immortal, and knew that man has not two lives, one to be destroyed and the other to be made indestructible" (369:16).

The Golden Text is from John (17:3): "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." Christian Science Society, Albany, also holds Wednesday evening meetings at 8 p.m. and Sunday School at 9:30 a.m.

## Finnish Student, Here For Past Year, Tells Of Life In Finland With Its 60,000 Lakes

(This is the first of a series of articles by Marianna Rickinen, an exchange student at Albany High School for the past year. Her visit here was made possible by the activities of the American Field Service Student Exchange Program.)

**By MARIANNA RICKINEN**  
Finland — one of the many small nations which carry more or less meaning to a foreigner... If not a country of the classical polar bear, Finland might be the country of Sibellus or Paavo Nurmi to you, or the country of a thousand (in fact sixty thousand) lakes, or the country that pays its debts. But behind genius, behind the labels of great deeds, there is the country itself — the Finland I left behind for one whole year.

When I left it, it was summer, hot summer, the thermometer had risen to plus 85 F. It was August, the time when the "nightless nights" of midsummer start being replaced by full, ripe, yellow August moons and fancy crab-parties in lantern-decorated gardens. And when the camellias and Japanese cherry trees were at their best in California in February, I knew that people in Finland were enjoying, fearing, and discussing a frost of minus 32 F. But the varieties of seasons, the adventure of sun and snow is not the only thing that makes Finland Finland. Forests — 72 per cent of the country is covered by them — are one of the characteristics of my country.

Not only are they the resource of our chief exports, wood and paper, not only have they given me and many others the personal joy and excitement of hunting for wild berries amidst the green moss, but they carry the spirit of Finland clean and unchanged from the first centuries A.D. when the actual settlement of Finland took place. The birches, pines and spruces are witnesses of the closeness of the people to nature, of a relationship which not even the existence of two score cities with more than one fourth of the total population of the country in them can break. Their greenness together with the blue and white of the flag — lakes and snow — are the colors against which you have to build the people.

## Antique Dolls To Be Displayed At State Fair

**SACRAMENTO** — Hand-made and antique dolls, favorite displays of little girls and their mothers, will again be exhibited in the Women's Building at the California State Fair and Exposition, August 27 - September 7.

Mrs. Florence M. Doe, Fair director in charge of Home Economics, has announced the deadline for entry in the competitive classes is August 11.

Hand-made dolls in competition will include originally designed character dolls, stuffed animals, groups and pairs of dolls, stamped dolls and recently made bisque or porcelain ceramic dolls. All of the hand-made dolls will also wear hand-made clothes.

Mrs. Doe defined antique dolls as being 50 years old or older. The antique dolls will be displayed on stands and will be checked for authenticity. Sections in the antique dolls competition will include China, French bisque, German bisque, Parian, papier mache, baby dolls, French fashion and wax dolls. Dolls eight inches tall or smaller may be entered in the miniature section, Mrs. Doe said.

Premium awards in the two exhibits will total \$156.50 this year. Premium booklets listing awards and entry rules are available by writing to the California State Fair and Exposition, P. O. Box 2036, Sacramento.

# Tuna-Cheese Scallop-

Stymied for new ideas for meatless Lenten meals? It's no problem with good, wholesome dairy foods and fish. Here's a unique Tuna-Cheese Casserole that will bring a welcomed change from the usual menu pattern.

In chewy Tuna-Cheese Scallop, evaporated milk, tuna fish and cheese all supply protein which is so important to include during Lent, when meatless meals are planned.

Evaporated milk lends a rich, creamy flavor to casserole dishes and white sauces. And it is so easy and economical to keep evaporated milk on the pantry shelf.

A bright fruit salad would be a perfect accompaniment for golden Tuna-Cheese Scallop.

**TUNA-CHEESE SCALLOP**  
4-6 Servings

1 1/2 quart casserole  
350° oven, 45 minutes  
5 slices bread  
2 tablespoons softened butter  
1 1/2 cups sharp Cheddar cheese, grated

1/2 cup sliced, stuffed olives  
1 7-ounce can tuna fish, drained & flaked  
3 eggs, beaten  
1 tall can (1 1/2 cups) evaporated milk  
3/4 cup water  
1/2 cup chopped onion  
1/2 teaspoon dry mustard  
1/2 teaspoon salt  
1 teaspoon Worcestershire sauce  
1/2 teaspoon tabasco sauce

Spread the bread with softened butter and cut into one-inch squares. Place half the squares in a buttered 1 1/2 quart casserole dish. Sprinkle 1/4 of the cheese over this and top with sliced olives, saving a few for garnish. Place the tuna fish on top of the olives, add the remaining bread squares and cheese and top with the olives. Beat the eggs, add the evaporated milk, water, onion, mustard and seasonings. Mix. Pour this mixture over the ingredients in the casserole dish. Bake in a 350° oven for 45 minutes.

# New Knitting, Charting Classes - At Adult Center

Three Knitting and two Charting classes are opening at the Albany Adult Center this week, with Mrs. Marion Ellinger as the instructor. Those residing in neighboring communities, as well as Albany, may enroll in these classes.

The Knitting classes are so organized and those enrolled so grouped that instruction is available for knitters at all levels, beginning through advanced. The two day classes are scheduled for Tuesday afternoons, 12:30 to 3:30, and Friday mornings, 10 to 1, both in the Science Room of Cornell School, 919 Cornell Avenue. The evening class will be held at the Albany High School building, 603 Key Route Boulevard, on Wednesday evenings, 7 to 10.

The two Charting classes, one day and one evening, will be taught by Mrs. Ellinger in the Science room of Cornell School. The day class is scheduled for Monday afternoon, 1 to 3; the evening class, Monday evenings, 7:30 to 9:30.

Mrs. Ellinger teaches the basic and complex stitches of knitting; the study of various yarns and needles and how they determine the size and texture of fabric and garment; how to interpret and alter written instructions to insure proper fit; and a variety of seam finishes for various garments.

The Charting classes are specialized courses for advanced knitters and do not include actual instruction in knitting as such. As a group, the class charts each part of a garment, such as skirts, collars and various types of sleeves. Then, as individuals, working under the supervision of Mrs. Ellinger, they take all their own necessary measurements and sketch their garments to conform. Work is done on graph paper, planning various neck shapings and any other part of the garment where intricate figuring must be done in advance. Class members also learn how to change book patterns to fit their own measurements or those of anyone else for whom they wish to knit; the development of suitable designs from pictures of finished garments; and how to develop knitting trimmings.
